

New Safety Assessment

ORCA Design Team

Proposal for Protective Capacities

Protective Capacities

- New capacities are grouped under Behavioral, Cognitive, Emotional headings
- Family Network/Environmental Factors heading is eliminated
- Each capacity can be marked 'enhanced', 'diminished' or left blank

Protective Capacities

- Example: 'The caregiver supports the child'
 - Enhanced ● Diminished
- User ranks enhanced & diminished capacities instead of protective capacities & priority needs
- Diminished capacities or safety threats import into case plan instead of Priority Needs, which are eliminated
